

GENE CHECK, INC.

COLLIE EYE ANOMALY-CEA TEST RESULTS

DREAM WINDS FARM

Allison Lutterman
3946 Hiseville Park Rd
Horse Cave, KY 42749

	ANIMAL ID	RESULT
1	Thor	NN
2	Aurora	NN
3	Jubilee	NN
4	Razor	NN

Samples Received: 7/17/2015

NN, or normal, indicates that the Collie Eye Anomaly mutation is not present.

ND, or carrier, indicates that the dog carries one defective gene (D) and may pass the defective gene on to their offspring.

DD, or affected, indicates the presence of two defective genes. Affected dogs will always pass the defective gene on to their offspring. Affected dogs may show signs of Collie Eye Anomaly.

Certification

Animal identification numbers and samples were provided to Gene Check by owner or owner's agent.

All tests were performed by Gene Check, Inc using naturally occurring DNA sequences.

Signed and sealed this 22nd day of July, 2015.

Gene Check shall not be held liable for inaccuracies due to sampling or labeling errors prior to the arrival of the samples at Gene Check and in no event will Gene Check be liable for any incidental or consequential damages, including but not limited to any lost profits or for any claim by owner based on a third party claim.
